WATER DISCOLORATION- VALVE ISSUE **Thursday, July 24, 2025**

A Valve issue at the pump house has caused a disturbance in the Village Water lines. Anyone using water for washing or drinking is advised to flush their lines until discoloration is gone. In the interim period, Sask Water is conducting tests on the water quality. Please treat this like a Precautionary Drinking Water Advisory until further notice.

Instructions

- (a)boil all water, used for drinking purposes, for at least one (1) minute, at a rolling boil, prior to use;
- (b)boil water to be used for other activities where it may be ingested, including:
 - (i)brushing teeth or soaking false teeth;
 - (ii)washing fruits and vegetables;
 - (iii) food or drink which will not be subsequently heated; and
 - (iv)ice cubes;
- (c)not use the water for washing dishes, unless the water has been boiled or the dishes are sanitized in another fashion. Washed dishes and utensils can be soaked in a bleach water solution (approximately 2tablespoons of bleach per gallon or 10 ml of bleach per liter of water) for at least two minutes after being washed to kill any bacteria which may be present.
Note: Do not mix bleach with soaps or detergents.
- (d)not drink from any public drinking fountains supplied with water from the public water supply;
- (e)ensure that younger children and infants are sponge bathed;
- (f)use an alternative water source known to be safe, if they do not wish to boil the water; and
- (g)consult with your physician if you have cuts or rashes that are severe before using the water.

Under most circumstances, there is no need to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Laundry may be washed in tap water, either by hand or by machine.

For more information please call the Village of Meota Office. 306-892-2277
